

The full

With the three playbooks

The full prompt files

Every prompt from the three playbooks in one place, complete and ready to copy, plus the sentence bank we build our image prompts from. Change only what sits in the orange brackets.

01 Claude: the 3D and the ride

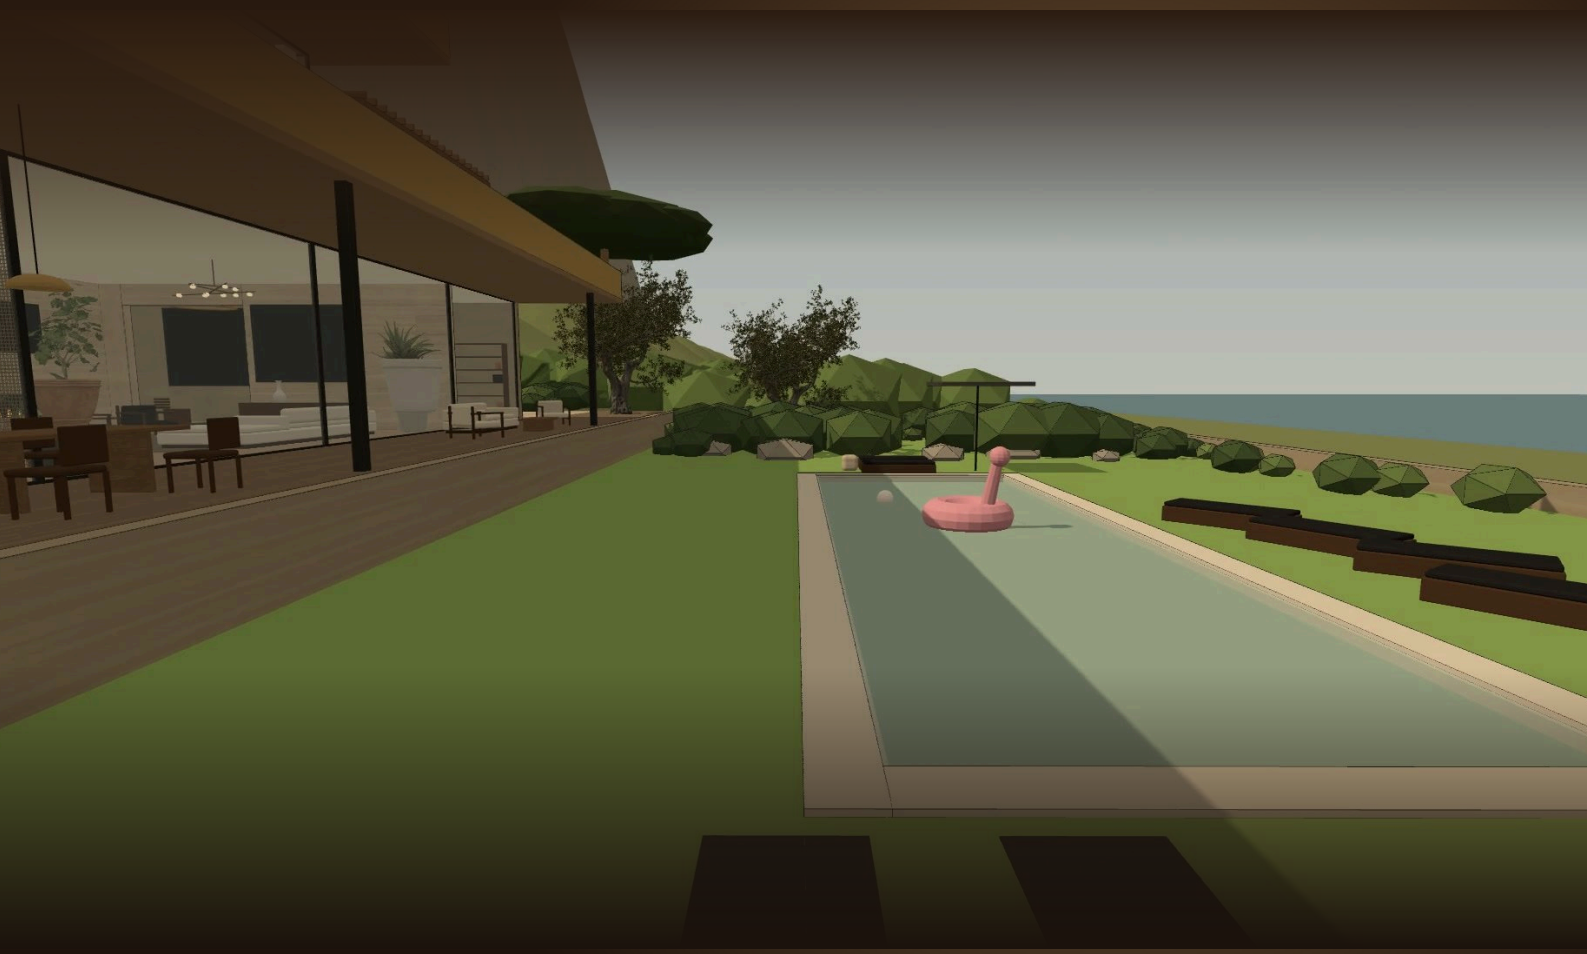

02 Nano Banana Pro: from the 3D to the photo

03 The sentence bank, thing by thing

04 Kling and Seedance: the clips

05 The DMs

> **Three rules that apply to every prompt here.** Write in English. Describe only what you want to see, because a "no" gets drawn (the clip tail in section 4 is the one exception). Give every surface its colour.

Section 01

Claude
the 3D and the ride

The prompts we use to have Claude build a room, a whole house and the ride through it, then to fix it one change at a time.

A room

1.1 · Room from measurements — Claude

Build a 3D model of a living room in three.js, in a single HTML page. Units are metres.
Room 9 × 6 m, ceiling 3.2 m. The long south wall is floor-to-ceiling glass in single panels with thin dark frames, glass at 16% opacity. On the opposite wall a TV wall 4 m wide in a dark stone colour, with a low cabinet 3 m long under the TV.
Sofa 340 × 100 cm, seat height 42 cm, two metres from the glass, facing the TV. Coffee table 160 × 90 cm, 35 cm high. Dining table 300 × 110 cm for ten, on the kitchen side. Ceiling of wooden slats with three dark beams.
Sun from the south-west at four in the afternoon, soft shadows. Orbit camera at eye height 1.6 m with a 24 mm lens.
Add a key that saves the current view as a 3:2 PNG with straight vertical lines. Use real catalogue sizes for every piece and list any size you had to guess.

1.2 · Room from a plan — Claude · attach the plan

This is the plan of the apartment, scale 1:100. Build the living room and kitchen in three.js in real metres, following the plan exactly: walls, openings, door swings, the position of the kitchen. Ceiling 2.9 m. Glass at 16% opacity. Furnish it with pieces at real catalogue sizes: a sofa 300 cm, two armchairs, a coffee table 140 × 80 cm, a dining table for six. Orbit camera at 1.6 m, 24 mm lens, and a key that saves the view as a 3:2 PNG. Tell me where the plan was unclear.

A house and the ride

1.3 · House for a reel — Claude · attach 3 to 5 references

Build a modern villa on a slope above the sea in three.js, in a single HTML page, units in metres, following the references I attach.
Ground floor only, on the path of the camera: entrance on the side of the house, a living room 10 × 7 m with a 4 m TV wall in stone, a dining table for ten, a kitchen with an island 4 m long, and a glass wall that opens onto a lawn with a pool 12 × 4 m.
Floor-to-ceiling glass in single panes at 16% opacity, ceiling 3.2 m. Furniture at real catalogue sizes, every piece within 3 cm.
Plants only in pots against the walls, never in the way of the camera. Sun from the west at five in the afternoon.
List the size of every piece in the console so I can check it.

1.4 · The ride — Claude

Add a smooth camera path through the house at eye height, 1.6 m, 24 mm lens: from behind the leaves at the side entrance, through the door, along the sofa, over the end of the kitchen island, out through the open glass and down to the pool, then turning back to see the villa from the lawn. Total 15 seconds, quicker at the start and slower in the living room.
Add a key that plays the path and records it as an MP4, 1920 × 1080 at 30 fps. Keep the vertical lines straight the whole time.

Fixing it

1.5 · One change at a time — Claude

Move the sofa 40 cm toward the glass and change nothing else.
Make the beams 30 cm deeper; keep the ceiling height.
Put the camera in the corner by the kitchen, looking at the window, at 1.5 m, and save that view.
Two frames of the ride look the same at seconds 6 and 8: move the camera, not the furniture, so each one shows something new.
Remove everything that is a placeholder: grey cubes, test spheres, helper lines.

Section 02

Nano Banana Pro from the 3D to the photo

The image prompts in the order we write them: camera, space, materials, light, life, depth, finish. Image 1 is always the 3D, then one real sample per material.

2.1 · Interior from the 3D — Nano Banana Pro · 3:2 · image 1 = 3D

Image 1 is the 3D: keep the camera, the walls, the openings and the place of every piece exactly as they are.
Interior photograph from the corner by the kitchen, 24 mm lens, camera at 1.6 m, two-point perspective with straight verticals. A living room 9 × 6 m with a dining table on the left and the seating area on the right, a glass wall to the hills on the far side.
Floor sentence, as in image 2. Wall sentence, as in image 3. Ceiling sentence with its height. Window sentence.
Main piece sentence. Table sentence. Lamp sentences, with the cables. The table tops are bare.
Sun from the left at four in the afternoon, long shadows across the floor toward the camera, the pendants off.
The back of the sofa close to the camera and out of focus, the room sharp, the hills soft in the haze.
Editorial architecture photograph in the spirit of photographer, natural colour like a Kodak Portra 400 film scan, gentle highlight roll-off, fine film grain.

2.2 · Exterior from the 3D — Nano Banana Pro · 3:2 · image 1 = 3D

Image 1 is the 3D: keep the camera, the volumes, the openings, the heights and the shape of the plot exactly as they are.
Exterior photograph from the lawn, low, at the corner of the pool, 24 mm lens, camera at 1.2 m, shot on a tilt-shift lens, perfectly vertical lines.
Facade sentence, as in image 2. Floor-to-ceiling glass in single uninterrupted panels, ultra-clear low-iron glass, slim dark bronze frames. Paving sentence. Pool sentence.
Furniture sentence: two sunloungers, never a row. Planting sentence with the species, in three layers.
Sun from the right, an hour before sunset, long shadows across the lawn, the first lights on inside.
Leaves close to the camera and out of focus, the house sharp, the sea soft in the haze.
Editorial architecture photograph in the spirit of photographer, natural colour like a Kodak Portra 400 film scan, gentle highlight roll-off, fine film grain.

2.3 · The night twin — Nano Banana Pro · image 1 = the approved day photo

Same camera position, same framing, same room as image 1, every piece and material unchanged. Change only the light: twenty minutes after sunset, the sky a deep blue over the city lights. The pendants and the floor lamp on at 2700 K, warm pools of light on the stone; the glass reflects the room faintly.

2.4 · The empty "before" — Nano Banana Pro · image 1 = the furnished photo

Same camera position, same framing, same room as image 1. Remove all furniture, rugs, lamps and objects: NO dining table, NO chairs, NO sofa. Bare concrete floor, bare walls, the windows and the ceiling unchanged, the same daylight.

The empty "before" is the one image prompt where we write NO in capitals: to empty a room the model needs it said out loud. Edited images come back shifted by about 1%, so align them to the original before you put them in a before/after.

2.5 · Virtual staging of a real photo

Nano Banana Pro · image 1 = the photo of the empty room

Image 1 is a photograph of an empty room: keep the walls, the windows, the floor, the ceiling, the camera and the light exactly as they are.
Furnish it as a living room: main piece sentence, table sentence, a large rug in charcoal wool, lamp sentences. Every piece at real size for a room of 4.5 × 5 m. The table top is bare.
Natural colour like a Kodak Portra 400 film scan, fine film grain.

2.6 · An existing building

Nano Banana Pro · images 1 to 3 = real photos

Images 1 to 3 are photographs of the real building. Keep it identical: proportions, number and position of windows and doors, stairs, volume and roof. Remove cars, scaffolding, temporary fences, signs and writing.
Change only this: the facade in warm white lime plaster, the window frames in dark bronze, warm lights on inside, a garden of olive trees and lavender along the front.

2.7 · A piece that must stay identical

Nano Banana Pro

The wine cabinet in image 4 is part of the project: copy it identical from image 4, same shape, size, material and colour, in the position it has in image 1.

2.8 · Upscale

Seedream 5.0 Pro · image 1 = the approved image

Upscale this image in quality, do not change anything else.

Section 03

The sentence bank thing by thing

Once a piece has its sentence, it keeps it in every prompt of the project. Copy, change what is in brackets, and always write the colour.

Floors

- wide-plank fumed oak floor, oiled, deep honey-brown
- herringbone smoked oak with thin bronze inlay strips
- fine Venetian terrazzo with small marble chips in *dark green / pink / grey*
- honed Grigio Carnico dark grey marble floor
- large-format honed Travertino Silver, unfilled
- a floor inlaid with bands of *stone* and bronze

Walls

- book-matched *veined stone* slabs floor to ceiling
- fumed oak panelling with bronze reveals
- book-matched burl walnut panelling
- marmorino plaster in deep chocolate, soft cloudy sheen (one wall only)
- tadelakt in graphite (one wall only)
- a backlit honey onyx wall
- silk wallcovering by Dedar in *colour*

Ceilings always with the height

- a ceiling of fumed oak slats between dark plaster beams, *3.4 m* high
- a coffered ceiling in dark-stained oak, *3.4 m* high
- a ceiling of lacquered wood like a yacht interior, deep glossy brown
- a ceiling clad in walnut panels with a recessed bronze light line
- a ceiling in honed dark stone slabs

Windows and curtains

- floor-to-ceiling glass in single uninterrupted panels, ultra-clear low-iron glass, slim dark bronze frames
- bare floor-to-ceiling glass, curtains hidden in a recessed ceiling pocket
- full-height sheer curtains in smoke-grey silk organza, gathered at the far edge of the glass
- heavy curtains in deep chocolate wool satin, stacked at the corner
- a sliding screen of raw ipe slats in front of the glass
- bronze mesh screens in front of the glass

Furniture write shape, size, material, colour

- a long low tailored sofa like Minotti Hamilton, 340 cm, crisp straight cushions upholstered in *fabric and colour*, slim dark bronze base

- a pair of armchairs like Minotti Daiki, dark burnished wood frame, seats in *fabric and colour*
- a low rectangular coffee table 160 × 90 cm, top in honed *coloured stone*, thin blackened steel frame
- a coffee table in smoked bronze glass like Gallotti&Radice Bisel
- an oval dining table 300 cm, top in *stone*, sculpted dark bronze base, chairs upholstered in *colour* with slim bronze legs
- a low bed with a wide headboard 110 cm high upholstered in *fabric and colour*, set against a wall of *material*, crisp white cotton bedding, two pillows and two square cushions in *colour*, one throw in *accent*

Lamps always some, with their cables

- Flos Arrangements in brass · Henge Light Ring in burnished brass
- Flos Aim pendants on long cables over the table
- a cluster of hand-blown glass globes on bronze rods like Bocci 28, hung at different heights
- a sculptural alabaster pendant · a ring of brass discs
- Flos Captain Flint floor lamp in dark bronze · Michael Anastassiades Tip of the Tongue table lamp

Kitchens

- handleless kitchen fronts in book-matched fumed oak, a full-height back wall of honed *stone*, a Gaggenau cooktop flush in the stone, a brushed champagne bronze tap
- an island in leathered *stone* with a deep carved recess lined in bronze, lit from below
- a long kitchen wall in *material* and a freestanding dining table of *stone* in the centre of the room

Bathrooms

- a vanity carved from a single block of polished Breccia Medicea with violet, ochre and grey clasts
- twin washbasins in Verde Guatemala · a sunken bath lined in honed Fior di Pesco Carnico
- Vola taps in brushed bronze · Dornbracht MEM taps in dark platinum
- a woven cotton bath mat in *colour* · thick folded towels in *colour* on a bronze rail

Objects and art one per surface at most

- the table top is bare
- a folded towel in *colour* on one sunlounger · car keys on a leather tray on the entrance console
- a bottle of champagne in a bronze ice bucket on the terrace table (evening only)
- one large sculptural vessel in black clay on the console
- a large unsigned *technique* in *palette*, in the spirit of *Burri / Fontana / Soulages / Sheila Hicks / Sugimoto*, hung at eye level, thin bronze frame

Facades

- large-format unfilled vein-cut travertine, honed, with dark bronze slim window frames and oiled teak soffits
- Taj Mahal quartzite cladding with a leathered finish, shou sugi ban charred cedar panels, burnished bronze details
- chiseled Florida keystone coral stone with fossil shells, board-formed concrete with formwork marks, Brazilian ipe soffits and screens
- warm white lime plaster with hand-trowelled variation, accoya louvres, fine terrazzo with shell fragments on the terraces
- board-formed concrete in warm grey with formwork marks, blackened steel frames, American black walnut soffits, walls of honed Basaltina

Paving, pools, plants

- honed Travertino Noce pavers with open pores and sand-coloured joints · oiled teak decking silvering at the edges · large stepping slabs of grey Basaltina set in low groundcover
- a pool lined in green Sukabumi stone, the water a soft jade · a pool lined in dark Basaltina, the water a dark mirror · Istrian stone coping with crisp arrises
- a long lap pool 30 × 3.5 m along the terrace · an L-shaped pool wrapping the corner of the house · a pool with a sunken stone bench and a shallow sun shelf
- Miami: naturalistic layered tropical planting, mature leaning coconut palms of different heights, sea grape, silver saw palmetto, unclipped, salt-burned leaf tips
- Dubai: a ghaf tree, irregular clusters of Medjool date palms with diamond-cut trunks, frangipani, pale sand between the beds
- Los Angeles: a California sycamore and coast live oaks, tall Canary Island palms, clusters of Agave attenuata planted in the ground, golden chaparral on the slope

The closing line

3.1 · End of every image prompt — Nano Banana Pro

Editorial architecture photograph in the spirit of photographer, natural colour like a Kodak Portra 400 film scan, gentle highlight roll-off, fine film grain.

Section 04

Kling and Seedance the clips

One slow move per clip, written as camera and light. The room is already in the image, so describing it again only makes the furniture change.

4.1 · The formula

Kling 3.0 · pro · sound off · 3 to 4 s

The reference image is the first frame; keep the room layout, the furniture and the materials exactly. Only the camera moves: one slow move with its start and end. Keep all vertical lines straight. What moves: water, leaves, a curtain. What stays out of focus in front.
Smooth stable camera, real speed, no particles, no sparkles, no glitter, no magic effects.

The move for each view

View	Move
Exterior, arrival	A drone that comes closer slowly, or a sideways slide along the facade
Entrance	A reveal from the threshold, then a short push in
Living room, lobby	A sideways slide or a light orbit
Kitchen	A slide along the island or the worktop
Bedroom	A soft push in
Bathroom, spa	A short push in
View from a window	A move toward the glass until the view fills the frame
Double height	A tilt from the ceiling down
Detail	A slow push or pull with a slight change of focus

Moves that worked copy and adapt

Shot	Prompt
Master view	Slow lateral tracking shot to the right with a gentle push in toward the villa; the palm fronds in the foreground stay out of focus and slide across the frame, palm leaves sway softly in the breeze.
Pool	Low slow dolly forward over the pool edge toward the house. The pool water is perfectly calm, a still mirror with soft reflections. Palm leaves move gently in the breeze.
Drone	Slow aerial drone orbit around the villa with a gentle descent, waves roll softly on the beach, palms sway.
Rack focus	Slow lateral tracking shot to the right with a gentle push in, while the focus shifts: the foliage in the foreground comes into sharp focus and the facade behind softly falls out of focus, strong parallax between the leaves and the house.
Entrance	Slow dolly forward into the entrance hall past the out of focus door edge in the foreground, with a gentle arc to the right and a slight rise, strong parallax and depth.
Passing behind	Slow lateral tracking shot to the left passing behind the out of focus palm leaves in the foreground, revealing the whole kitchen island and the open glass wall to the sea, palms outside sway.
Worktop	Very slow macro slide along the veins of the quartzite countertop toward the bronze tap, soft sunlight moves across the stone.
Dining	Slow dolly forward from behind the kitchen island toward the dining table, the island and tap in the foreground stay out of focus, palms sway outside the open glass wall.
Bedroom	Slow push in from the balcony into the bedroom through the open glass doors, the glass balustrade in the foreground stays out of focus and slides down out of frame.
Bed detail	Slow soft arc along the upholstered headboard and the cushions, stripes of sunlight move gently on the bed, the foreground chair stays out of focus.
Dressing room	Slow lateral tracking shot passing behind the out of focus door frame in the foreground, revealing the dressing room island and the lit wardrobes.

4.2 · Keeping continuity — Kling 3.0

From the very first frame the camera slowly pans and tracks to the right, toward the double stone washbasins, keeping the window and the bathtub outside the frame on the left.

Use it when a move would show part of the room that looks different in another clip or close-up: send the camera the other way.

4.3 · The whole ride

Seedance · video 1 = the 3D ride · images = approved photos

Video 1 is the camera move and the geometry: follow its path, its speed and the position of every wall, opening and piece exactly. Images 1 to 4 are the finished rooms on the path, entrance, living room, kitchen, pool: take the materials, the colours and the light of each room from its image. Sun from the west at five in the afternoon, the pool water perfectly calm.
Smooth stable camera, real speed, no particles, no sparkles, no glitter, no magic effects.

Run it at 480p first to check the move and the rooms, then at 1080p.

Section 05

The DMs comment a word, get the PDF

The messages from Playbook 02, ready to paste into ManyChat. Change the word, the PDF and the link for each reel.

5.1 · Public replies — rotate two or three

Sent, check your DMs.
It's in your inbox.
Just sent it over, have a look in your messages.

5.2 · DM 1 — button: *Send me the PDF*

Hi, it's Nico from Omnya Lab 👋 You asked for the Blueprint, the four steps we use to turn a rough 3D into a real photo (it's free, no catch). Tap below and it's yours.

5.3 · DM 2 — after the tap

Here it is: link?utm_source=instagram&utm_medium=manychat&utm_campaign=word
The last page takes you to the full method, and if you want to try it on one of your projects, the first image is on us. Just reply PROJECT and I'll ask you three quick questions.

5.4 · Follow-up — after 23 hours, only if no tap

Still here if you want the Blueprint, no rush. Tap the button above whenever you like.

5.5 · Reply PROJECT — three questions, one at a time

What kind of space is it: a villa, an apartment, a hotel, something else?
Where is the project now: plans, a 3D model, or already under construction?
When do you need the images?
