

The checklist before every delivery

With the three playbooks

omnyalab.com

The checklist before every delivery

The check we run on every image and every clip before it leaves the studio. Print it, keep it next to the screen and tick it for each delivery. If a point fails, don't edit: write the prompt again with the fix inside and generate from zero.

Project	
Delivery, round	
Images and clips in this delivery	
Checked by, date	

1 · Before you generate the 3D and the prompt

- ◯ The 3D shows only what belongs in the picture: no placeholder cubes, grids, helper lines or test objects.
- ◯ Furniture at real size, glass almost clear, railings below the eyes where the view matters.
- ◯ Camera at 1.5 to 1.7 m (about 1.5 m in kitchens), from a corner or a doorway, verticals straight, lens 14 mm or longer.
- ◯ The eight things named, each with its material and its colour: floor, walls, ceiling with height, windows, main piece, table, lamp, objects.
- ◯ Outside: facade, paving, water, furniture, plants with the species.
- ◯ One main light, with the hour and the direction of the shadows; lamps on or off as the hour says.
- ◯ Nothing written as "no", "without" or "avoid"; none of the words from Playbook 01, chapter 3.
- ◯ Image 1 is the 3D, then one flat real sample per material. No mood photos, few references.
- ◯ Every piece keeps the same sentence it has in the other prompts of the project.
- ◯ The prompt ends with the closing line.

2 · Every image the eight points, in order

- ◯ **Structure.** Building or room the same as the 3D or the photos: windows, doors, stairs, proportions.
- ◯ **Geometry.** Verticals straight, two-point perspective, furniture in scale with doors and people.
- ◯ **Light.** Shadows going one way, lamps right for the hour, ceiling lights present, no candles.
- ◯ **Reflections.** Glass, mirrors and polished stone reflect what is really there.
- ◯ **Materials.** Texture visible, no plastic sheen; tiles, joints and veins straight.
- ◯ **Life.** The room is complete and lived in; people natural, hands and faces right.
- ◯ **Fidelity.** The project's pieces identical to their references; the client's past corrections still there.
- ◯ **Cleanliness.** No invented writing or logos, no particles, nothing the client asked to remove.

3 · The thirty-second scan for the AI's fingerprints

- ◯ Legs: none missing, doubled or melting into the floor.
- ◯ Lamps with cables; nothing floating or fused.
- ◯ No lines that stop halfway.
- ◯ No cloned palms or repeated patterns.
- ◯ No turquoise water, orange sky or HDR glow.
- ◯ No beige sofa, travertine plinth, tray of books or linen curtains you didn't write.
- ◯ No olive tree in a pot, mushroom lamps or fluted panels you didn't write.
- ◯ No new object in a corner that is empty in another view.
- ◯ The same materials in every view of the same room.
- ◯ Edges not over-sharpened by the upscale.

4 · The upscale

- ◯ Only the approved image, with Seedream 5.0 Pro and "Upscale this image in quality, do not change anything else."
- ◯ Or GPT Image at 4K, quality high.
- ◯ Compared side by side with the approved image: nothing moved, nothing added.

5 · Every clip

- ◯ Made from an approved image, with one slow move.
- ◯ Kling 3.0 in pro mode, sound off, no presets; the prompt ends with the line against particles and sparkles.
- ◯ Nothing bends or melts: walls, doors, window frames and the signature pieces of the project.
- ◯ Water perfectly calm; people, if any, at real speed.
- ◯ Depth in the move: something in front, out of focus, and parallax. No clip that stands still.
- ◯ Continuity: every object the move reveals is the same, and in the same place, in the other clips and close-ups.
- ◯ At most two redos per clip; the redos and the credits spent are noted.

6 · The delivery

- ◯ Images in 4K, in every format the client needs: 16:9 · 3:2 · 4:5 · 9:16.
- ◯ From 10 views, the free 10-second clip of the best view is in the folder.
- ◯ Films with music, editing, colour grading and the reels for social media.
- ◯ Files named the same way in every format, in the order of the visit.
- ◯ The round of changes is written down: what the client asked, what changed. Two rounds are included.
- ◯ No logos, signs or writing you didn’t mean to be there, on any frame.
- ◯ The delivery date matches the one confirmed before the work started.

If one box stays empty
don’t send

Write the full prompt again with what you liked and the fix inside, generate from zero and run the check once more.
