The launch kit that sells a tower

For real estate agents and developers

The launch kit that sells a tower

People who buy off-plan buy what they can see, so what you show and in which order decides the sale. Here is what a launch needs and what to ask from whoever makes it.

Who it's for

Agents who list off-plan units and developers who launch them. You don't need to make a single image yourself: this playbook tells you what to order, how to brief it and how to tell a good render from one that makes buyers doubt.

Credited on your first order

The €29 you paid for this playbook comes off your first Omnya order, whatever you order.

01 The 8 images and the 30-second film a launch needs

02 Choose your floor: the website that sells a tower

03 A brief you fill in once and send to any studio

04 What it really costs, from our own price list

05 The mistakes that make a render look fake to a buyer

Chapter 01

The 8 images and the 30-second film

A buyer walks through your project in the order you show it. Eight images and a short film are enough to take them from the street to the terrace, and they are what our smallest launch package includes.

The eight images in the order a buyer sees them

Think of a visit. The buyer arrives, goes in, goes up and ends at the window. The brochure, the listing and the website follow the same order, so each image answers the question the one before raised.

1 · The building

2 · The arrival

3 · The lobby

4 · The amenity

5 · The living room

6 · The kitchen

7 · The bedroom

8 · The bathroom

Image	What it has to do
1 The building	The hero, usually at dusk, with the lights on and the context around it. It's the cover of everything, so it has to read even as a thumbnail.
2 The arrival	Street level: the entrance, the drop-off, the landscaping. It tells the buyer what coming home feels like.
3 The lobby	The first interior. It sets the level of the finishes for the whole building.
4 The amenity	The pool, the rooftop or the gym, whichever the project is known for. One, done properly, beats four small ones.
5 The living room	With the view, because the view is what people buy in a tower.
6 The kitchen	The island and the materials up close enough to see the stone.
7 The bedroom	Calm, with the bed in proportion to the room. Buyers measure the space with their eyes.
8 The bathroom	The stone and the bath, close enough to see the veins.

> **One unit, one set of materials.** Rooms 5 to 8 must belong to the same apartment: same floor, same stone, same light. A kitchen from one type and a bathroom from another make the buyer wonder which one they're getting.

The 30-second film shot by shot

The film is made from the approved images: each one becomes a clip of three or four seconds with one slow camera move. Thirty seconds is short enough for a reel and long enough to tell the visit.

Seconds	Shot	Camera
0 to 4	The building at dusk	Slow drone push toward the tower, lights coming on
4 to 7	The arrival	Sideways slide along the entrance, leaves passing in front
7 to 10	The lobby	Reveal from the doorway, then a short push in
10 to 14	The amenity	Low slide over the water, the pool perfectly calm
14 to 18	The living room	Slow move toward the glass until the view fills the frame
18 to 21	The kitchen	Slide along the island, focus on the stone
21 to 24	The bedroom	Soft push toward the bed and the window
24 to 27	The bathroom	Short push in, light moving on the stone
27 to 30	The end card	Logo, name of the project, the contact

From the same clips you cut three vertical reels of 10 to 15 seconds for social media: the building, the apartment and the view. Music, editing and colour grading are part of the film, not extras.

Chapter 02

Choose your floor the website that sells a tower

The buyer moves along the tower, a floor lights up, and with one tap the camera flies in through the glass of that floor, into the living room and on to the bathroom. Here is how it works and what it needs from you.

The demo we built for a tower in Dubai Marina: the buyer moves along the floors, the selected one lights up, and the panel shows the unit before the flight in.

What the buyer sees

1. **The tower at dusk.** Moving the mouse or the finger along it lights up one floor at a time, with a panel that shows the level, the type of unit and the size.
2. **The flight.** A tap on "Enter level 15" and the camera flies from the sky to that floor and in through the glass.
3. **The apartment.** The living room with its view, then the bathroom, as one continuous move.
4. **The way back.** The same move played in reverse, back out to the tower, ready for another floor.
5. **The end.** The logo and one button to register interest.

How we build it

The look depends on one rule: only original video, never photos or effects stitched between clips. We tried crossfades, blur and frames made up in between, and they all looked cheap on a big screen.

Plan

Model

Room

- **From the plan to the rooms.** Each unit type goes from its plan to a 3D model seen from above, then to the photos of its rooms, so the layout on the page is the real layout.
- **The flight** is one video made with Seedance, from the sky to the glass of the floor.
- **The rooms** are clips made with Kling, and each one starts on the last frame of the clip before. That is why there is no jump between the flight and the living room.
- **The way back** plays the same video in reverse, so it always matches the way in.
- **Every clip at exactly 1920 × 1080,** with the colour of the bathroom matched to the living room.

What it needs from you

What	Why
Number of floors, heights, which floors are on sale	To build the tower and light up only what you sell
Plans of every unit type	The rooms and the flight follow the real layout
The views at different heights: drone photos, or the exact position and orientation	The view from floor 15 must be the view a buyer will have
Finishes and furniture level per type	So the rooms show what the contract says
Availability and prices per floor, if you want them on the page	And who updates them when a unit is sold
Logo, fonts, colours, the legal line	The page carries your brand, not ours
Where it will live: your domain, or a page of its own	We hand over the files or put it online

Choose your floor isn't on our price list, because it depends on the number of unit types and floors.
We quote it together with the launch.

Chapter 03

A brief you fill in once

Most of the back and forth with a studio comes from what wasn't said at the start. Fill in this page once, attach the files and send it to any studio, ours included.

The project

Project name and developer	
Address, or coordinates and orientation	
Stage: design, approved, under construction	
Unit types, sizes and floors	
Who buys: end users or investors, from where	
Price range of the units	

What you send

- ◯ Plans, sections and elevations (PDF or DWG)
- ◯ 3D model, if there is one (SketchUp, Revit, Rhino, any format)
- ◯ Finishes schedule: floors, walls, kitchen, bathrooms, joinery
- ◯ Photos of the site and of what surrounds it, drone if possible
- ◯ Reference images of the style you want, three to five
- ◯ Logo, fonts and colours

What you want back

Images: how many, which rooms and views	
Film: length, music, language of the end card	
Reels: how many, 9:16	
Formats: brochure, website, billboard, portal	
Day and night versions	
Launch date and first delivery date	
Who approves, and how many rounds of changes	
Budget	

What to ask any studio before you pay

- **A first image on your project,** before the full order. We do the first one for free; others may charge a sample fee, but you should see your own project, not their portfolio.
- **How many rounds of changes are included,** written in the quote.
- **The delivery: resolution and formats.** 4K and every format you need, from the brochure to the 9:16 reel.
- **Timings from the deposit,** and the delivery date confirmed before the work starts.
- **Who can use the images, where and for how long.** Portals, billboards and the agents who resell the units included.

Chapter 04

What it really costs from our own price list

These are our prices as they stand on omnyalab.com, the same in every country. Use them to read any quote you receive, ours or anyone else's.

Launch packages images and film together

Package	Price	What you get
Launch S	€2,900	8 images, 30-second film, 3 reels. In 5 days
Launch M	€4,900	15 images, 60-second film, 3 reels, presentation. In 1 week
Launch L	€8,900	25 images, 2-minute film, 6 reels, presentation. In 2 weeks

Launch S is exactly chapter 1 of this playbook: the eight images, the 30-second film and three reels, from the same work.

Or line by line

Images	Price	Per view
1	€90	€90
10	€690	€69
20	€1,190	€60
30	€1,500	€50
12 a month	€599	€50

Films	Price
30 s, reels and pitches	€1,200
60 s, launch film	€2,200
90 to 120 s, full launch film	€3,900
Virtual staging	from €25
Photo retouch	from €25

- **Every image pack** includes two rounds of changes and 4K in every format. From 10 views, a free 10-second clip of the best view.
- **Every film** includes music, editing, colour grading and the reels for social media.
- **The monthly plan** is 12 new views a month with delivery in 48 hours, for at least three months. Views you don't use move to the next month.
- **Payment** is 50% on confirmation and the balance on delivery. Timings start from the deposit.
- **The first image is free,** so you see your own project before you decide.

What a launch can return

€1,860
that earned almost €100,000

Hygeia Grove, Corfu. The resort only existed on paper. With 24 images and a 90-second film, for €1,860, the architect presented it before the first stone was laid. His client fell for the story told in the film and gave him the project. The architect earned almost €100,000 from it, and construction has already started.

To read another studio's quote, put it next to these lines: how many views, at what price each, how many rounds, which formats, how long the film is and what it includes. A low price per view with one round of changes and no 4K can end up costing more.

Chapter 05

The mistakes that make a render look fake

Buyers don’t know what an AI default is, but they feel it. These are the details that make someone stop trusting an image, and with it the project.

What makes a buyer doubt

1 **Empty rooms,** or one sofa in the middle of a hall. Buyers can't picture life in a room nobody furnished.

2 **Everything beige** and the same floor in every room. It reads as a template, not as a home.

3 **Cloned palms** and the same tree pasted along the street, an English lawn in the desert.

4 **Shadows going two ways,** lamps on at noon, a sunset on the side the building doesn't face.

5 **Turquoise water and an orange sky,** the glow of an HDR filter, edges too sharp.

6 **A lens that makes rooms huge.** A 12 mm view of a 3 × 4 m bedroom wins the brochure and loses the buyer at the first visit.

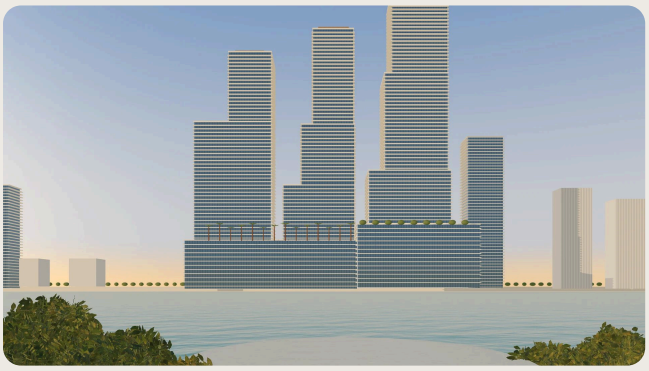

7 **Furniture out of scale:** a two-metre bed in a room that takes a 1.60, chairs too small for the table.

8 **People who look placed:** stiff, in evening dress at breakfast, with the wrong number of fingers.

9 **Invented writing** on signs, boats and shop windows, logos that don't exist.

10 **Materials that change** between two views of the same apartment.

3D model

Final image

Burtville, Residence 77. The towers, their heights and their position on the water come from the 3D, so the image shows the project and not an invention.

The view is a promise

The view from the living room is what people buy in a tower, so it's the one thing a render can't improve. If floor 8 will look at the next building, show the next building. Ask for the view to be built from drone photos taken at that height, or from the real position and orientation, and keep those files with the project. Many markets ask for a line such as "artist's impression" on images of projects not yet built: check with your lawyer what yours requires.

Before you publish five checks

- [ ] The building and the unit match the plans: windows, balconies, heights.
- [ ] The rooms 5 to 8 belong to the same unit, with the same materials.
- [ ] The view matches the floor and the orientation.
- [ ] Light and shadows agree with the hour, in every image.
- [ ] No invented text, no logos you don’t own, no people that look placed.

Launch it
with us

Send us the plans or the model of the project. The first image is free, the first views arrive in 1 to 2 days, and the €29 of this playbook comes off your first order.

Package	Price	What you get
Launch S	€2,900	8 images, 30-second film, 3 reels. In 5 days
Launch M	€4,900	15 images, 60-second film, 3 reels, presentation. In 1 week
Launch L	€8,900	25 images, 2-minute film, 6 reels, presentation. In 2 weeks
